

# Mohammad Abdullah

abdullahniaz27@gmail.com | <https://github.com/MohdAbduuu>

## EDUCATION

---

### Information Technology University

*B.S. in Computer Science*

**2023-Present**

*Lahore, Pakistan*

**Relevant Courses:** Machine Learning, Data Structures, Algorithms, Files & Databases, Artificial Intelligence

### International School of Pakistan Kuwait

*O/A level*

**2019-2023**

*Khaitan, Kuwait*

**Relevant courses:** English, Maths, Physics, ICT, Sociology, Business studies, Chemistry

## TECHNICAL SKILLS

---

**Languages:** Python (Advanced), SQL, C++, C#

**AI/ML & Data Science:** PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib.

**Web & APIs:** Flask, Streamlit, OpenAI API, LangChain

**Specialized Knowledge:** Machine Learning & Deep Learning, Data Visualization, Problem-solving, Neural Networks (CNNs).

## PROFILE

---

A high-achieving Computer Science student and **NASA Space Apps Global Nominee** with a strong focus on **Python-driven AI/ML solutions** and Data Science. Proven track record in developing intelligent applications using **OpenAI API, LangChain, and TensorFlow**. Passionate about open-source collaboration and seeking to leverage technical creativity as a Software Engineer in the Data, AI/ML, and Analytics space at Canonical.

## PROJECTS

---

### Traffic sign Classifier | Deep Learning & Computer Vision

- **Tech Stack:** Python, TensorFlow, Keras, Scikit-Learn, Pandas
- Engineered a **Convolutional Neural Network (CNN)** to classify signs from the German Traffic Sign Recognition Benchmark (GTSRB), achieving **95% accuracy**
- Implemented advanced image preprocessing techniques to manage dataset variations and optimize model performance..

### Mock AI | Intelligent Interview Application

- **Tech Stack:** Python, Streamlit, OpenAI, LangChain
- Integrated the **OpenAI API** and **LangChain** to analyze user responses in real-time and provide constructive feedback.
- Engineered the application to **simulate** various **interview scenarios**, enhancing user preparedness for **actual interviews**.

### Secure Authentication System | Backend Development

- **Tech Stack:** Python, MySQL.
- Developed an end-to-end intelligent interview simulation tool that analyzes user responses using **Natural Language Processing (NLP)**.
- Integrated **OpenAI API and LangChain** to provide real-time, constructive feedback, simulating various professional interview scenarios to enhance user preparedness.

## AWARDS & CERTIFICATIONS

---

- **Collaborator for NASA Space Apps:** Demonstrated ability to work in distributed, high-performing technical teams.
- **Nasa Space App Global Nominee:** Recognized for excellence in a high-stakes, global collaborative environment.
- **IBM Data Science Professional Certificate:** Validated expertise in data analysis and machine learning workflows.
- **IBM Data Science Professional Certificate:** Validated expertise in data analysis and machine learning workflows.
